

## PROCEDURES FOR ESTABLISHING A NEW CAMPGROUND

Issued under authority of Part 125 of 1978 PA 368, as amended.

Michigan's Public Health Code, 1978 PA 368, as amended, (the Act) and the administrative [rules](#) adopted pursuant to the Act establish the requirements for building and operating a campground. A campground is defined in Part 125 of the Act as: *"a parcel or tract of land under the control of a person in which sites are offered for the use of the public or members of an organization, either free of charge or for a fee, for the establishment of temporary living quarters for 5 or more recreational units."* A license from the Michigan Department of Environmental Quality (MDEQ) is required prior to operating a campground.

Prior to obtaining a license to operate a campground, a construction permit must be obtained from the MDEQ. The developer should contact the local health department in the county that the campground is to be located and the MDEQ to arrange a meeting at the site. A site evaluation will be conducted to determine if there are any limitations for the type of campground to be developed. If there are no limitations, then a construction permit must be secured from the MDEQ prior to commencing the work. A proposal will have to be submitted that meets the requirements outlined in the administrative rules for campgrounds. The following documents will have to be submitted to the MDEQ and the local health department:

1. A completed [Application for a Campground Construction Permit](#) along with the applicable fee made payable to the STATE OF MICHIGAN and three sets of plans and specifications to the MDEQ.
2. A copy of the construction permit application and one set of plans and specifications to the local health department.

The MDEQ will review the proposal along with any comments provided by the local health department. The applicant should allow an average of 4 weeks for the MDEQ to complete the review of the proposal that is submitted. The applicant will then be issued a campground construction permit or advised in writing of the aspects of the proposal that do not comply, as appropriate.

Prior to obtaining a license to operate a new campground, a pre-licensing inspection by the MDEQ and the local health department must be completed. The following documents must be submitted to the MDEQ:

1. A completed [Application for Annual Campground License](#) along with the applicable fee made payable to the STATE OF MICHIGAN.
2. An affidavit signed by the owner and/or engineer, where applicable, indicating the work completed was in accordance with the approved plans and construction permit.
3. Copies of the final approvals from the plumbing and electrical inspectors having jurisdiction.
4. A copy of the safe bacteriological sample results from the water supply system.

The developer contacts the MDEQ to arrange a pre-licensing inspection of the campground once all of the documents have been received. If construction was completed in accordance with the approved plans and permit, the MDEQ will issue a campground license. **IT IS UNLAWFUL TO OCCUPY CAMPGROUND SITES WITHOUT FIRST OBTAINING A LICENSE FROM THE MDEQ.**

Additional information regarding construction and licensing of campgrounds in the state of Michigan can be obtained on the internet at [www.michigan.gov/deqwb](http://www.michigan.gov/deqwb) or contact the MDEQ at the following offices:

Michigan Department of Environmental Quality  
Drinking Water & Environmental Health Section  
Water Bureau  
525 West Allegan Street, P.O. Box 30273  
Lansing, Michigan 48909-7773  
517-241-1340
